

Ben Grant, a Cadet at Otiwhiti Station Land Based Training School has been driving the Massey Ferguson MF6713 Tractor, purchased through TRC Feilding.

Ben said he has driven other tractors but finds the Massey Ferguson very easy to drive, with one control to change the speed and he finds the controls are very intuitive. He also said it is very simple to put implements such as the loader bucket and aerator on and off.

The large windows and sloping bonnet on the tractor are certainly helpful to ensure great visibility when operating the tractor and when changing the implements.

Ben often drives the tractor on the open road between farms and said the tractor is nice and comfortable to drive and the suspension is very smooth.
